

# UPTIME INSPECTION PACKAGES

BY SEMA EQUIPMENT

## WHY SHOULD I DO ANNUAL INSPECTIONS?

1

### LOWER OVERALL MAINTENANCE COSTS

**Reduce or eliminate wasteful spending!**

We will catch broken or near-broken mechanical parts that if not caught, could cause other good parts to fail.

**Example: A failed bearing results in the unnecessary failure of a shaft that runs through the bearing - causing wasteful spending on the good part and the labor to replace it.**

3

### INCREASED PERFORMANCE

We will make sure that your machine delivers maximum fuel economy, maximum grain quality, and more crop throughput by replacing worn parts and inspecting and adjusting all crop and powertrain delivery systems.

2

### MINIMIZE OR ELIMINATE DOWNTIME

**No more underutilized labor when downtime goes away!**

We will make sure that you are in the fields and operating to maximize yields and feed quality -- all while maximizing your bottom line.

4

### PEACE OF MIND

You know your equipment is ready to go, regardless of the conditions.

#### Our Uptime Inspection Process:

1. John Deere Certified Technicians do a thorough inspection of your equipment, annually.
2. Upon completion, the Technician or Service Manager does a walk-around with you to review suggested repairs on broken mechanical parts and worn parts that we believe won't last the season or will cause poor machine performance.
3. The Technician will review with you the mechanical parts that are showing wear, but will likely perform adequately during the coming season. These parts might have to be replaced before the next season and will be reviewed again during the next annual inspection.
4. You will be given a quote including parts and labor to complete the suggested repairs.
5. You will be offered the John Deere Financial No Payment, No Interest financing offers available.

#### Uptime Inspection Packages

Prepare for the upcoming season and prevent downtime with uptime inspections. Ask your service manager to put it on your John Deere multi-use account and get 270 days no payment, no interest.

INSPECTION	WAS	SAVE	NOW
PLANTER (PER ROW)	\$67	\$32	\$35
